Location
Daeyeon-dong, Nam-gu, Busan, South Korea

Nationality
Bangladeshi

SKILLS

- Security Operations: Authentication log analysis, SSH brute-force detection, basic threat modeling (STRIDE, DREAD)
- Operating Systems: Linux (Ubuntu), command-line fundamentals, file permissions, user management
- Networking: TCP/IP fundamentals, Nmap, basic network scanning
- Programming and Data: Python, pandas
- Tools: Git, GitHub, UTM

EDUCATION

Tongmyong University
Information Security and Systems
Expected graduation: June 2027
CGPA: 3.93/4.50

LANGUAGES

- English: IELTS Academic 6.0 (July 2023)
- Korean: Basic; preparing for TOPIK (January 2027 planned)

PROFILE

Fourth-year Information Security and Systems student at Tongmyong University with a strong interest in cybersecurity, particularly security operations, threat detection, and incident response. Developing practical skills in Linux, networking, and security monitoring. Seeking a SOC Analyst or cybersecurity internship to apply my knowledge and develop hands-on experience in security operations.

PROJECTS

SSH Brute-Force Detection Tool

Python · Linux · Authentication Logs

- Built a Python-based tool with AI coding assistance to analyze Linux authentication logs for potential SSH brute-force activity.
- Explored how repeated failed login attempts can indicate suspicious authentication behavior.
- Developed practical familiarity with Linux log analysis and basic security detection concepts.

SecureExam Pro

Personal project · Online exam platform with security monitoring

An online exam platform with a threat monitoring dashboard and a focus on exam security. View the live site

Diabetes Prediction with a Decision Tree

Machine learning project

Predicted diabetes from 8 routine health measurements for 768 patients, reaching 79% accuracy on 154 held-out test patients. Replaced impossible zero values with the median and limited tree depth to reduce overfitting. View the Colab notebook · View on GitHub

Linux Practice Lab

Self-study · Ubuntu 26.04, UTM, nmap

Completed a four-week plan covering file permissions, users, `grep`/`find`, pipes, and basic networking with nmap.

EXPERIENCE

Part-time Hall Server

서면 곱창 (Seomyeon Gopchang), Busan · Sep 2026 – Present

- Communicated with customers and colleagues in a busy restaurant environment.
- Coordinated tasks and prioritized service requests during peak hours.
- Followed workplace procedures and maintained accuracy under time pressure.
